REGIONAL TECHNICAL BULLETIN

Subject : Propeller selection for Yanmar Saildrive SD20

Yanmar Marine International would like to inform you concerning the Propeller for the Yanmar Marine SD20 Saildrive Unit. The following propellers have been tested and approved by Yanmar Marine International B.V (please find below). All below mentioned propellers have a rubber bush inside to absorb engagement shocks.

Fixed blade propeller, any brand with rubber bush, maximum diameter:

- a) 3 blade 16" b) 2 blade 16"

Feathering or Folding type 2 or 3 blade maximum diameter 16".

- a) **SPW Variprop DF107, Feathering type.** b) Flex-o-fold, Folding type.
c) Autoprop, Feathering type. d) **SPW Varifold, Folding type.**

The use of any other propeller on the SD20 will void the warranty on the Saildrive.

Warning:

Always put the Saildrive in neutral when under sail, not doing so will cause slipping.

Slipping caused by not putting the saildrive in neutral during sailing is excluded from warranty.
